Jack Templeman

I am a self-taught developer with five years of web development experience with a background as a mid-weight designer. My curiosity and self-driven nature drives me to continuously expand my knowledge, refine my skills, and explore emerging tools and frameworks that improve my efficiency.

With a background in design, I bring a sharp eye for frontend work and a strong ability to visualise data structures and workflows when tackling backend challenges. I thrive on solving complex, multifaceted problems that help users get closer to their goals as seamlessly as possible.

Skills

Education

BTEC Extended National Diploma Graphic Design

Bedford College 2010 - 2012

HND Graphic Design

Bedford College 2012 - 2014

Experience

Designer

Self-employed

2013 - 2015

Worked with local and national businesses on an array of design projects with varying levels of complexity.

Built and maintained long-term client relationships through years of successful collaboration.

Mid-weight Designer

We Can Creative

2014 - 2019

Led complex rebranding projects across both traditional and digital channels.

Liaised with key stakeholders to craft accurate and detailed briefs, ensuring we were meeting or exceeding client expectations.

Managed personal and junior designer's workload to ensure projects were delivered on time, within budget, and to an exceptional standard.

Developer

We Can Creative

2019 - Current

Analysing client requirements and providing bespoke tailored solutions at various budget levels.

Managed the entire development process independently across multiple projects, from concept, wireframing and design to build and deployment.

Utilised PHP, vanilla JS/TS, React, Svelte, Next.js and SvelteKit to design and build over 100 bespoke websites and web apps of varying complexity over my five years of experience.

Researched and implemented new packages and concepts within the PHP, JS/TS, React and Svelte ecosystems, sharing insights with the team.

Analyse and interrogate briefs to establish the best stack to use moving forward to ensure an effective, flexible and budget friendly outcome.

Independently managed, maintained, and deployed website and web apps across multiple hosting platforms, regularly evaluating their effectiveness and cost.

Troubleshoot and resolve any and all issues related to code or deployment.

Translated client feedback into actionable tasks, providing professional guidance where needed or requested.

Established and refined internal processes to ensure projects progressed predictably and securely.

Early adopter and advocate for the safe use of LLMs.
